

### **Participants' comments on which effect the seminar has had on them and their future.**

- *Esteban Giancarlo Bacilio from Venezuela, studying at University of Oviedo in Spain:*  
It has been an enriching experience to learn more about the smart grid challenges and future projects in Denmark. I can see great job opportunities here and I might considering Esbjerg as a place to work and make a career path.
- *Marie Schimmelmann from Germany, studying at Aalborg University in Aalborg, Denmark:*  
The Seminar helped me a lot to have a more holistic view about the topic of smart grids, that I only knew from the respective as a power systems engineer before. Now, I can better understand the issues related to social, economical and environmental impacts.
- *Raluca Maria Nemes from Romania, studying at University of Southern Denmark:*  
I have learned new things regarding both engineering and business. The seminar offered me a broad perspective over the future, that is Smart Grids. I am heading towards a career in this area after I graduate.
- *Georgios Tsolaridis from Greece, studying at Aalborg University in Aalborg, Denmark:*  
The seminar was overall a nice experience and helped me realize how Denmark is intending to handle with energy issues.
- *Sheeraz Niaz Lighari from Pakistan, studying at Aalborg University in Esbjerg, Denmark:*  
I am now quite aware of the current developments and progress in smart grid market and can see so many opportunities for me in this field.
- *Frederick Ofei from Ghana, studying at Aalto University in Finland:*  
The seminar has really given me a huge sense of satisfaction and commitment knowing that I will in the near future contribute to the implementation of smart grid in my country and the world as a whole.
- *Ramy Zaher Geogious from Egypt, studying at University of Oviedo in Spain:*  
After seminar, i started to think about returning back to Denmark to study or to work as i found it is very nice country.
- *Avinash Dhital from Nepal, studying at Aalto University in Finland:*  
It had a positive impact on me. I discovered new possibilities in smart grid and power to gas sectors. Also, the job opportunities in Esbjerg are promising.
- *Ghulam Mustafa Shoro from Pakistan, studying at Aalborg University in Esbjerg, Denmark:*  
I would like to say that seminar have practical knowledge and gave me a chance to understand the danish grid architecture
- *Qi Chen from China, studying at University of Southern Denmark:*  
This seminar makes me see a lot of opportunities to build the bridge between Danish and Chinese companies.

- *Saioa Burutxaga from Spain, studying at Aalborg University in Aalborg, Denmark:*  
Smart Grids seminar was helpful to put together knowledge about the different systems that form a smart grid.
- *Dimitar Genov from Bulgaria, studying at University of Southern Denmark:*  
Denmark is the role model for the bright future and that is giving me the opportunity to implement so ideas and turn them into future business opportunity back home.
- *Niels van Dulmen from Holland, studying at University of Southern Denmark:*  
Had a lot of new insights and new business ideas during the seminar.
- *David Martinez Perez from Spain, studying at Aalborg University in Aalborg, Denmark:*  
It's not only about smart meters and doing fancy things with them.
- *Jannik Tim Bartels from Germany, studying at FH Flensburg in Germany:*  
The smart grid seminar was a great opportunity to understand the Danish energy sector with all the ambitious projects regarding a intelligent energy maintenance. On the top of that the exchange of knowledge with the wide variety of international students was a brilliant experience for my personal knowledge.
- *Elena Malz from Germany, studying at Aalborg University in Aalborg, Denmark:*  
The seminar gave me a broader view about smart grids, especially in terms of the heating sector. It was motivating to see what interesting jobs are available.
- *Philipp Braun from Germany, studying at Aalborg University in Aalborg, Denmark:*  
I could build a new network and got to know new companies.
- *Filip Forster from Croatia, studying at University of Southern Denmark:*  
An interesting seminar that answers all of the questions you might have about the smart grid - a must for anyone who wants work on improving the power grid.
- *Carlos Gomez from Spain, studying at Aalborg University in Aalborg, Denmark:*  
It gave me a general understanding of the smart grid idea as well as the problems that face at the present but I would have expected a more technical approach.
